Aberdeen- Grays Harbor PUD will conduct a power outage impacting approximately 1,300 customers in east Grays Harbor County this evening. The outage is necessary to repair damage to a transmission pole on Dunlap Road in the eastern part of the county. The outage will allow crews to make repairs and replace the pole, which appears to have been struck by a vehicle (there was no vehicle at the scene and the damage was reported by a customer). The outage will begin once crews arrive at the scene with materials, which is expected to be about 7:30pm (updated time) this evening (Tuesday, July 28). The duration of the outage is expected to be about 3 hours. The area that will be impacted by the outage is located south of Porter and east to Anderson Road. This includes Oakville, South Bank Road and Highway 12, and the Cedarville area.
